

MIMO 200

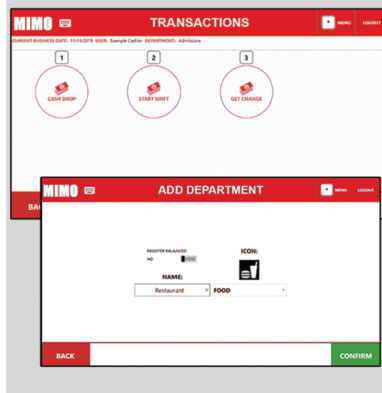

A fully flexible cash and coin recycler
made for absolute automation.

Did you know most managers spend over 20 hours per week dealing with cash? Most cashiers even report spending up to 45 minutes per day just counting and sorting their cash!

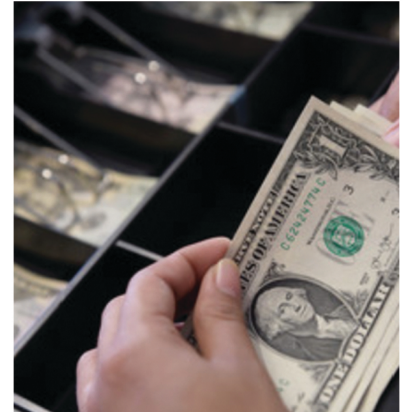

Real-time inventory status

High capacity cash cassettes and coin hoppers offer secure and controlled storage of your inventory.

Simple software built for speed

MIMO CORE's intuitive response, flexible interface, and user-friendly design makes using MIMO easy for your whole team.

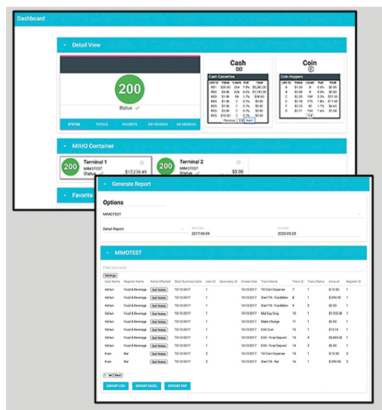

Fast and accurate authentication

Eliminate errors and reduce the amount of time spent handling cash. MIMO 200 improves efficiency and the cashier experience.

Cloud-Based Back Office reporting

From your desk or home office you can access data, customize alerts, and track inventory for multiple MIMOs across various sites.

Manage up to a year's worth of data

Detailed reports and activity logs make reconciliation and auditing a breeze! MIMO can even print a bank deposit slip.

Export to your preferred format

Securely monitor your cash levels and download employee transactions from any computer, tablet, or smart phone.

Still spending hours counting, verifying, and preparing employee banks by hand? In a world of increasing technology, why would you keep doing things the old-fashioned way?

Break free from your routine with a solution designed to simplify your time-consuming and expensive daily cash responsibilities. MIMO 200 is a cash and coin recycler that prepares banks, makes change, verifies drops, secures your inventory, and elevates your Back Office with detailed, digitized reports.

Without the pressure to sort, count, and validate cash - MIMO gives your team the freedom to focus on your business.

**Save time
and
reduce
costs**

**Simplify
operations**

**Eliminate
errors**

**Optimize
cash flow**

**Speed up
audits**

**Track
inventory
and
identify
trends**

**Minimize
the risk of
internal
theft**

With streamlined procedures and effortless end-of-day reconciliation, most MIMO customers have seen an ROI in as little as 12 months.

MIMO also offers one of the best financing plans on the market. With one payment per month for equipment, maintenance, and upgrades...you could even start seeing savings as soon as Day One!

MIMO 200 operates using MIMO Core, our proprietary cash management software. Designed using SQL as its backbone, and certified PCI compliant, MIMO 200 thrives on integration, seamlessly fusing HR or POS systems and any additional MIMO Cash Handling Solutions.

The entire cash room is right at your fingertips!

Smart Hopper technology

Coin audits are easier than ever with MIMO Coin's eight Smart Hoppers, offering inventory tracking and high-speed payouts.

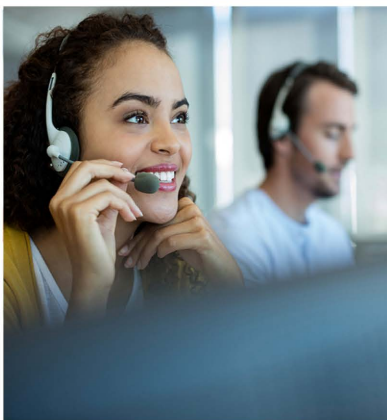

Electronic till sensor and coin dispense

MIMO Coin's opening can adjust to fit your existing till drawers. Coin is dispensed loose and sorted directly into the till.

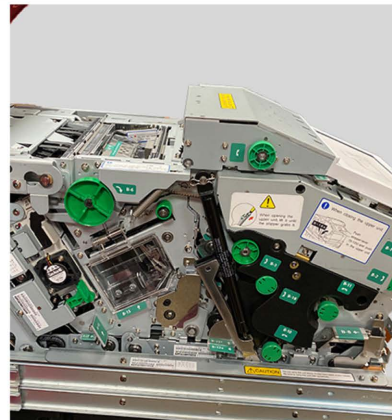

Optional features and accessories

MIMO is easy to customize with additional features like specialized receipts, wheels, and a compact all-purpose shelf.

24/7 Support via chat, email and phone

MIMO's industry-certified Technical Support utilizes a ticketing system that allows customers to see the progress of their request in real-time.

User-friendly hardware design

Color-coded components, easy-access modules, and on-screen diagrams make common troubleshooting simple for any user-level.

Accredited nationwide technicians

MIMO offers six-months of free service, with a six-hour SLA and same-day shipping available on most parts.

Q: Will cashiers get to choose their bill and coin breakdown?

A: MIMO makes dispensing tills quick and easy by letting you preset the breakdown for each department. Users just have to login and press "Start" to receive their preassigned till. Vault and Admin staff have additional permissions which allow them to request custom denominations and amounts if needed.

Q: Can I limit the amount of money users can dispense?

A: Yes - each user will need to be assigned a Daily Dispense Limit. This defines how much a user can dispense in a 24-hour period. You can also assign "unlimited" dispense access to Vault and Admin staff.

Q: Do I have to buy special receipt paper or custom till drawers?

A: MIMO uses standard thermal receipt paper, similar to your POS, and MIMO Coin's till opening is adjustable to fit most drawers.

Q: What do I do about bills that are damaged or unreadable?

A: Any low-quality or indecipherable bills that get refused can be manually deposited via the "Misc Media" option. Some MIMO customers use this option to drop items like bad bills, checks, tokens, and coupons into a separate safe once they are added to the employee's daily totals.

Q: Can a user perform functions on behalf of someone else?

For example, if runners are picking up cash throughout the day, or if someone goes home sick and leaves their drawer.

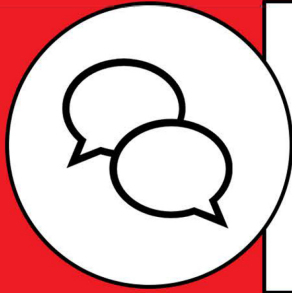

A: Yes! MIMO has optional "Proxy" functions that allow designated users to dispense banks, make change, and perform deposits on behalf of other users.

Two PCs for continuous data backup of every transaction.

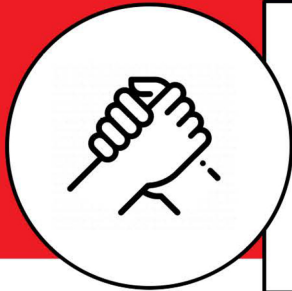

Remote software upgrades and patches designed to keep MIMO easy to use.

MIMO incorporates the security and features of Windows 10.

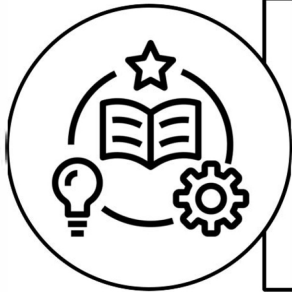

PCI Compliant and fully integrated for Back Office operations.

MIMO's dedicated experts will help transition your business to cash-automation, working alongside your staff every step of the way. From professional installation to in-person and virtual training options, you can finally shift your focus from cash to customer.

Our nationwide team handles preventative maintenance, repairs, software updates, and ongoing support during your entire cash management transformation.

With online courses, video tutorials, proactive diagnostics, and a 24/7 Technical Support team, we guarantee you will feel confident with every aspect of MIMO operations.
